

# Job posting: Frontend & Mobile Web Developer (m/f/d)

## About us

Health Study Club GmbH is a young, innovative company based in Erlangen, Germany. We are committed to improving patient care, enhancing healthcare efficiency, and driving scientific progress - bridging technology and medicine for a smarter, data-driven future. We develop scientifically validated health apps and operate a modular platform for the digital collection, monitoring, and analysis of medical data - for patients, healthcare professionals, research institutions, and other stakeholders in the healthcare sector.

### Our mission

We aim to prevent disease and relieve symptoms through digital, evidence-based solutions. Our apps and platforms are designed to make living with illness easier while providing comprehensive support for both mental and physical challenges. We place great emphasis on developing high-quality medical applications that meet the highest standards of data protection and security.

### What we offer

- **Flexible working:** Remote-first with home office as standard — only a few days per year at our location in Erlangen
- **Meaningful work:** Your work directly contributes to improving people's health and quality of life and supporting research
- **Innovative environment:** Flat hierarchies, short decision-making processes, and room for your own ideas
- **Personal development:** Opportunity to take on responsibility and grow technically
- **Interdisciplinary team:** Collaboration with team members from software development, medicine, and quality management
- **Modern technologies:** Work with current frameworks and tools in an agile development environment

## Your profile

### Your tasks

- Development and continuous enhancement of our mobile health apps with Ionic
- Collaboration on our modular research and study platform
- Implementation of responsive, user-friendly interfaces for web and mobile
- Working closely with our interdisciplinary team of software development, QM, and medical experts
- Actively contributing to architectural decisions and technical concepts
- Code reviews and quality assurance in the development process

### Required:

- University degree in computer science, media informatics, or a comparable qualification
- Several years of professional experience in front-end and mobile web development
- In-depth knowledge and practical project experience with **Ionic**
- Confident use of HTML5, CSS3/SCSS, and TypeScript/JavaScript
- Experience with modern web frameworks and build tools
- Fluent in German (native speaker level)
- Good written and spoken English
- Ideally based in southern Germany
- Independent, structured way of working and ability to work in a team

### Desirable:

- Experience with **Vue.js** and **Vite**
- Knowledge of regulated software development (e.g., medical devices according to IEC 62304)
- Experience with REST APIs and backend integration
- Familiarity with agile development methods (Scrum, Kanban)
- Interest in digital health solutions and medical applications

### Interested?

Then we look forward to receiving your detailed application with your resume, relevant work experience or GitHub profile, and your salary expectations.
